Abstract (en)  
[origin: WO2013053370A1] The invention relates to an article of clothing (1) comprising a textile supporting material (2) that encompasses a section of the body of the wearer of the clothing (1), wherein on the side of the supporting material (2) that faces the section of the body an adhesive layer (3) is arranged on the supporting material (2), which adhesive layer is in contact with a part of the section of the body when the article of clothing (1) is being used as intended, and the textile supporting material (2) without the adhesive layer (3) stretches by a first elastic extension value (Deltas1) under the exertion of a defined extension force (F0). To exert a stimulative effect on the skin of the wearer of said article of clothing, according to the invention the textile supporting material (2) including the adhesive layer (3) stretches by a second elastic extension value (Deltas2) under the exertion of an extension force (F0), which is at least 65%, preferably 75%, of the first elastic extension value (Deltas1).
