Abstract (en)
[origin: WO2013053823A1] The invention relates to a dishwasher (1), in particular a domestic dishwasher, comprising a dishwashing compartment (2) that has a loading opening (4), in particular a front-side loading opening, comprising a door (3) that closes the loading opening (4), and comprising at least one receiving basket (5, 6) for washware, said basket being movable out of the dishwashing compartment (2) and into same. The dishwasher comprises a device (18) for detecting at least one movement position of the receiving basket (5, 6), said device operating contactlessly in particular, and a control device (26) that controls at least one light source (27), which is arranged in and/or on the dishwasher (1), dependent on the at least one movement position of the receiving basket (5, 6).
