Abstract (en)
[origin: WO2013053606A1] A car (3) for an elevator can be moved in an elevator shaft (2) and has a car roof (5), over which a drive unit (4) partly projects. A protection device (6) is arranged on the car roof (5) in the region of the side near the drive unit, said protection device having a handrail (7) that is interrupted in a drive receiving region in the center. The protection device (6) has a beam (8) in the drive receiving region, said beam being offset downwards and inwards relative to the handrail (7).
