Abstract (en)

[origin: WO2013054021A1] The invention relates to a device including an insert (2) made of a plastic material and arranged so as to enable the attachment of a knob, said insert having a portion overmolded onto one of the ends (1a) of said lever (1), as well as a space (2b) coaxially aligned with the portion (2) of the insert overmolded onto the end of the lever (1), said space enabling the limited coaxial movement of the knob (3) and of the insert (2) relative to the lever upon the exertion of an impact on the knob (3), with a view to absorbing the impact.
