Abstract (en)

[origin: EP2767184A1] The clasp (1) has a connector comprising an end link (10) sliding along a longitudinal direction of the clasp between a first position in which the end link is partially engaged in a cover (2) of the clasp, and a second position in which the end link is outside the cover, where the end link comprises a push-button (36). The end link is provided with an arresting unit for preventing a removal of the end link from the cover of the clasp, where the arresting unit comprises a lug, which projects into a groove (30) arranged in the bottom of the cover, and the groove defines two end stops (18).
