Abstract (en)
[origin: EP2767189A1] The folding frame has a support frame (9) with a laterally mounted lifting gear. A joint lever (4) is fastened between two subframes (1,3) and the support frame in an articulated manner, and another joint lever (7) is fastened between the support frame and an articulation point on the latter subframe in an articulated manner. The latter joint lever is clamped to the support frame by spring force. A control rod (5) is guided from the latter joint lever to the former joint lever in an articulated manner and is mounted on the support frame.
