Abstract (en)

[origin: EP2767477A1] The device has outlet openings arranged in an interior (5) of a shrinkage device main portion facing an outflow surface of shrink unit. A shrinkage agent (3) is conducted over a shrinkage agent distribution device (5a) into the interior and the outflow surface and coated on a packaging unit in which product is accommodated. Shaft walls (30) are constructed in series along a conveying direction of shaft chamber modules (32d). The shaft chamber modules are assigned in the shrinkage agent distribution device of each shaft wall.
