Abstract (en)

[origin: EP2767638A2] The inflow and overflow fitting (1) has a water conduit channel that is provided in an attachment element (10), over an axle swingable nozzle (14) to adjust the direction of water jet entering into bath tub (8). The conduit channel and nozzle are connected with each other through connector. One connector is provided with a hollow cylindrical connecting portion having a slot through which a projection portion of another connector is inserted. A form-fitting connection of connecting portion is performed according to the rotary movement of nozzle relative to conduit channel.
