Abstract (en)

[origin: EP2767663A2] The connection profile has a frame having a parallel portion that is provided with an attaching unit (4), and that is extended at the frame. A window vertical portion is provided with a connection unit on one side and a fastening and/or support unit on specific surface. An insulating material (32) is inserted between the frame and a profile. A portion (6) and a window vertical portion are connected by using the releasable attaching unit, by bracing the frame.
