Abstract (en)  
[origin: WO2013056873A1] The invention relates to a cartridge, comprising at least one receiving chamber (2) extending in the longitudinal direction for a medium to be discharged, a head part (4) and a cartridge wall (3), which delimit the receiving chamber (2), wherein a piston (8) is provided, which can be introduced into the receiving chamber (2) at the end that faces away from the head part (4) and can be displaced in the longitudinal direction along the cartridge wall (3) to form a seal, and wherein the cartridge wall (3) is made of a cardboard and is joined to the head part (4) in a sealed manner. The invention further relates to a multi-component cartridge.
