Abstract (en)

[origin: WO2013056693A1] The invention relates to an underwater vehicle (1) having an optical beam operating system (2), wherein the beam operating system (2) has a radiation generator (20), a radiation emitter (22) and a radiation transmitter (24, 28) that connects the radiation generator (20) to the radiation emitter (22), wherein the radiation generator (20) is provided on or in the underwater vehicle (1) and wherein the radiation emitter (22) can be moved by the underwater vehicle (1) to the surface of the water (W).
