Abstract (en)
[origin: WO2013057296A1] The present invention relates to a key casing, in particular for a motor vehicle, including: a casing (7) including an insert recess (9) having a longitudinal shape for receiving an insert (5), and a key head (3) to be attached to the insert (5) and forming a key (1), said key head (3) forming a cover for closing the key casing (7) as well as a portion for gripping the key (1); and complementary reversible snap-fitting means supported by the casing (7) and by the key head (3), wherein at least one snap-fitting means is translatably movable between a rest position and a free position, in a direction that is substantially perpendicular to the position in which the key head (3) is snap-fitted onto the casing (7).
