Abstract (en)  
[origin: WO2013057080A1] The invention relates to a piston (2) for an internal combustion engine. It is essential to the invention that a region of the piston (2) on the crankshaft side is provided with a thermally conductive coating (5) that is sprayed on by means of a thermal spraying method. Thus, it is possible to economically apply the thermally conductive coating (5) within the production line.
