Abstract (en)

[origin: CA2852331A1] The invention relates to a method for distributing and/or transmitting information. An information carrier comprises a code, said code being read and processed by an addressable reading device. The reading device carries out a location determination which is triggered by the code, and an operation which is defined by the code is triggered on the reading device, said operation causing a response which is addressed to the reading device. The invention is characterized in that the location is displayed on the reading device. The invention further relates to a corresponding information carrier.
