Abstract (en)
[origin: WO2013057075A1] The invention relates to an automatic catering machine (1) in which at least one item of food (2) can be stored, cooled and/or heated. According to the invention, the automatic catering machine (1) comprises a rack store (3) for storing a large number of items of food (2) and a transportation apparatus (4) by means of which in each case at least one item of food (2) can be removed from the rack store (3) and transported to at least one station (S1, S2, S3, S4) in the automatic catering machine (1), wherein the transportation apparatus (4) has a transportation tool (7) for grasping the item of food (2), which transportation tool (7) can be moved horizontally and vertically. The invention also relates to a method for operating the automatic catering machine.
