Abstract (en)

[origin: WO2013057008A1] The invention relates to a method for displaying image information on a display unit (7) of a vehicle (3), in which surroundings of the vehicle (3) is detected with a detection device (6) of the vehicle (3), and in which the vehicle surroundings are displayed as image information on the display unit (7) in a first representation (8) having a first perspective or in a second representation (10) having a second perspective, wherein the representation (8, 10) is automatically changed if the vehicle (3) is in a first lane (1) that runs at an angle into a second lane (2) and the vehicle (3) is moving in the direction of the second lane (2), and the detection device (6) of the vehicle (3) can detect the second lane (2) within its detection range (61a, 61b) at least to the side of the lateral delimitations (1a, 1b) and the front delimitations (1c, 1d) of the first lane (1). The invention also relates to a driver assistance device (4) and a vehicle (3).
