Abstract (en)
[origin: EP2769636A1] The shoe (1) has an opening- and hollow section (4) for facilitating step in and step out, where a lacing and a zipper are assigned to the opening- and hollow section so that the opening section is closed by tensioning the laces or by closing the zipper (6). The lacing is threaded back and forth by deflecting units arranged on an inner side of the shoe wall. The lacing extends under the shoe wall in a completely covered manner during closed shoe wall slot (15a,15b).
