Abstract (en)

[origin: EP2770129A2] The waste disposal station has a receiving connection piece (42) which is connected with a collecting pipe (32) leading to a central tank or a drainage system. The receiving connection piece is pivotable against the collecting pipe from a receiving position, in which the cassette is inserted with its discharge port in the receiving connection piece, into a tilted emptying position for emptying the cassette. The receiving connection piece is inclined at an acute angle of more than 55 degrees to the horizontal in the emptying position.
