Abstract (en)
[origin: EP2770136A2] The bracket (1) has a base leg (3) for fastening the bracket on a slab formwork. A holding leg (5) is arranged at a right angle to the base leg for fastening a slab edge formwork plate. Nail loops (16) are arranged at the holding leg for spaced holding of the formwork plate. A truss or a bar is formed between lower and upper cover plates (11, 13) of the base leg. The holding leg is extended over the lower cover plate by a spur (15). Separable sections (15', 15'') are formed at the spur along preset breaking lines (17). The nail loops are formed at the spur.
