Abstract (en)
[origin: EP2770216A1] The valve assembly (1) has a modular manifold assembly with a joint region (8) that is provided with joint surfaces (7) that is set with scheduled distribution modules (5) in lining direction. A valve support module (14) has a valve unit (2) that is arranged with valve working channels (34b) connected to valve support working channels (43). The valve support working channels of valve support module are fluidically connected to collecting working channels (46) in the joint region in manifold assembly.
