Abstract (en)
[origin: EP2770492A1] A label holder (1) for attaching an electronic label (4) to a support (5), which support comprises a supporting arm (51) and a cross-piece (52) arranged transversely to the supporting arm. The label holder comprises; a label receiving portion (10), a cross-piece receiving portion (30) arranged to enclose at least a portion of the cross-piece and defining a first pivotal axis about which the label holder is pivotal in relation to the support, and an angle adjusting portion (20), which is movable between at least two different positions and which is arranged to, in at least one of said positions, be supported by the support for maintaining the label holder in a corresponding pivotal angle in relation to the support. The label holder further comprises a hinge (22) by which said angle adjusting portion (20) is pivotally connected to the label receiving portion (10), about a second pivotal axis.
