Abstract (en)
[origin: WO2013062420A1] Connecting system for electrical installations in tube columns such as an electric pylons where the connecting system is arranged for connecting up power distribution systems comprising a supply cable and optionally one or more branching cables, and an electrical consuming system comprising a consuming element with a fuse. Specifically the invention may e.g. relate to a connecting system for an electrical pylon, a road safety barrier or a road sign and so forth. Method for installing or troubleshooting said connecting system.
