Abstract (en)
[origin: WO2013060536A2] The invention relates to a cleaning device (10) for transport carriages (16) in a coating system. The cleaning device (10) according to the invention has at least one heating device (46) for inductively heating the runners (12, 14) of a transport carriage (16). In the cleaning device according to the invention, there is at least one brush station (52, 56) by means of which coating material can be removed from the heated runners (12, 14) of a transport carriage (16).
