Abstract (en)
[origin: EP2522253A1] The table (1) has plate portions (2a,2b) that are arranged relative to each other in storage position. The edge portions of plate portions are arranged in a plane (E1) to face each other in use position. The plate portions are locked with connection component (7) by a locking device (14) in use position. The plate portions are engaged at connection component, when plate portions are pivoted from storage position to use position. The engaging of plate portions at connection component is prevented, when plate portions are pivoted from use position to storage position.
