Abstract (en)  
[origin: EP2772589A1] The machine has a hydraulic attachment i.e. arm, including a pivot bearing (1). A separator plate (2) is provided at the pivot bearing. The separator plate is connectable to the pivot bearing and to hydraulic lines. The separator plate includes a first connection section (3) to which the hydraulic lines are connectable to one another and/or to the separator plate. The hydraulic lines are arranged in an interior region of the attachment. The separator plate is made from a metal material, a metal alloy material, a fiber composite material, a plastic material or another material having torsional stiffness.
