Abstract (en)

A system (10) is described for fixing and supporting parapets comprising a plurality of base elements (12), configured to be supported and to be fixed on a generic installation surface of the system (10), wherein each base element (12) is shaped so as to house and retain a respective substantially vertical upright (14), a plurality of uprights (14), configured so as to retain and support one or more sheet-shaped elements (16) which form the protection elements of the parapet, and at least one substantially horizontal handrail (18) fixed on the top of the uprights (14). Each base element (12) is made of a first plate-shaped component (20), provided with fixing means (22, 26, 30) to the installation surface of the system (10) and with adjusting means (24, 28) of the positioning of such a first plate-shaped component (20) with respect to the installation surface of the system (10), and of a second bowl-shaped component (32), provided with fixing means (36, 38, 40) with respect to the first plate-shaped component (20) and with at least one shaped housing seat (34) for receiving in shape-coupling the base portion of each upright (14).
