Abstract (en)
The invention relates to an encasing for household appliances, especially household cooking appliances or household laundry washing and/or drying appliances or household dish washing appliances, - comprising wall elements (10, 20) connectable at corresponding connection points to each other and/or to a frame, - wherein at least some of the connection points are implemented by one or more corresponding lugs (100) and receiving portions (200) for receiving a corresponding lug (100) at or in the wall elements (10, 20) and/or frame, - wherein at least one, preferably each, lug (100) has at most two free edges (112, 113) and/or a single free corner edge (125), whereas at all other sides of the lug a continuous transition to the wall element or frame is formed, - wherein the free edge(s) (112, 113) and/or the single free corner edge (125) of the or each lug (100) at least partially engage or engages with the corresponding receiving portion (200) and - wherein the least one, preferably each, lug (100) protrudes from a first plane (P1) of the wall element (10) or frame.
