Abstract (en)

A banknote processing unit (10) is provided with a housing (102), a banknote processing unit (10) and a banknote storage unit (30) which are housed within the housing (102), and a unit guide mechanism (50). The unit guide mechanism (50) is provided with a first guide unit (152) disposed horizontally along an inner wall of the housing (102), a first guided unit (162) disposed at an outer wall side of the banknote processing unit (10), and a first coupling mechanism (164). The first coupling mechanism (164) has a first distance adjusting unit (168) which modifies the distance between the first guided unit (162) and the banknote processing unit (10) when force in the horizontal direction is received as a result of movement of the banknote processing unit (10).
