Abstract (en)  
[origin: CN103961024A] A nozzle for a vacuum cleaner that comprises a soleplate with a suction channel slot therein for the suction of debris from a surface (S), a wheel mounted for rotation about an axis to support the soleplate on said surface, and a suction pipe connector for rotation about an axis (A) that is coaxial with said wheel axis. The wheel has a radius (h) of at least 25 mm, and a distance across the surface between a point of contact of the wheel with the surface that is directly beneath the wheel axis and a point midway between the leading and trailing edges of the suction channel slot which is no greater than 80mm.
