Abstract (en)

[origin: WO2013050018A1] The invention relates to a riblet foil and to a method for producing same. According to the invention the riblet foil (10) has a layered structure. A metal powder is applied to a reference mould (11), which has a negative shape of a riblet structure (13), so that a metal material is formed. The layered portion (14) applied in this manner is detached so that a riblet foil (10) having a riblet structure (13) is formed.
