Abstract (en)  
[origin: WO2013064942A1] A measuring device for measuring geometric data of a track for rail vehicles, which measuring device uses a measuring car with running rollers which run on the upper rolling faces of the rail heads of the track rails and with track rollers which can be positioned against the insides of the rail heads. Guide bars which project in front of and behind the track rollers in the longitudinal direction of the track are provided on the measuring car.
