Abstract (en)

[origin: EP2774522A2] The apparatus (1) has a rigid gripping section (7) vertically overlapped on a wiping surface (19). A suction opening (26) is extended along a longitudinal edge of the wiping surface. An extending direction is aligned at a profile of the suction opening. A freshwater tank (9) and a waste water tank are separated from the apparatus and arranged opposite to transverse and longitudinal extents of the gripping section. Sucking in and blowing out directions of a fan are aligned along the extending direction of the gripping section. Face surfaces (5, 6) are formed as a standing area (32).
