Abstract (en)

[origin: EP2775031A1] The stone element (1) has a common base with two base stone heads (2-4) that are separated by contraction joints (13). The stone heads are arranged offset from each other in axial direction of gutter and formed of different lengths. The respective strip-shaped spacers (5, 6, 10, 11) are arranged in the outer end portions vertical to axis side surfaces of stone heads. The spacers are arranged on opposite side surfaces and contacted with spacers of adjacent stone elements in installed state to form closure in lateral direction.
