Abstract (en)

[origin: EP2775048A1] The system has an outlet fitting base body (1) designed as a valve pipe i.e. overflow pipe, and an outlet valve comprising a sealing element arranged at a lower end of the body. A housing encloses the valve pipe, where flushing process is activated through lifting of the valve pipe. The body is connected with releasing modules (250, 300) by a connection unit for modularly forming an outlet fitting (610). The releasing modules are designed as mechanical releasing module, pneumatic releasing module, cable releasing module and stop-releasing module.
