Abstract (en)
[origin: EP2775076A2] The arrangement (1) has a grasp carrier (3) fastened to an inner side (4) of a door, and a holding element mounted on the grasp carrier. The holding element is provided with a push button for triggering an electronic door opening operation, where the push button is actuated through a door outer side (6) by a door onset part (8). The holding element comprises a grasp body for triggering a mechanical door opening process, and is pivotably connected with the grasp carrier. The push button is rotatably supported relative to the grasp body.
