Abstract (en)
The invention relates to the building industry and is intended for facing doors, windows and other openings of buildings and premises, mainly as a jamb lining of window and door openings. An angular facing profile comprising two facing elements 1 connected by one end-face side 2 at an angle corresponding to the angle formed by walls of the opening being faced to which the profile adjoins through its rear side, and each of which includes a central section 3, a first lateral section 4 and a second lateral section 5 rounded in the cross-section, curved towards the profile front face 6, arranged at the different sides of the central section 3, and a r-shaped fastening section 7 for attachment to the wall located at the rear side 8 of the profile and connected by one side 9 with central 3 and the second lateral 5 sections at their junction, between the other side 10 of the #-shaped 7 located in parallel to the rear side 8 of the profile and the second lateral section 5 a gap 11 is made that is capable of accommodating the attachable facing profile, at the other end-face side 12 of the central 3 and first lateral 4 section a protruding mounting element 13 is provided; and at the other end-face side 14 of the second lateral section 5 there is provided at least one projection 15 capable of connecting other facing profiles.
