Abstract (en)
[origin: EP2775787A1] The device (1) comprises a cooking area (11) with a cooking point (21), a heating device (2) for heating a cooking zone (31) and a sensor device (3) for detecting a physical quantity in a detection area (83). The cooking area comprises a support element (5) for supporting a suitable food container. The sensor device is partially arranged below the support element. A sealing element is provided for thermal insulation such that a portion of sealing element is arranged between a portion of the support element and a portion of the sensor device.
