Abstract (en)
[origin: EP2775790A1] The device (1) has a cooking area (11) with a cooking point (21), and a heating device (2) that is arranged for heating of a cooking zone (31). A sensor device (3) is arranged for detecting a physical quantity. The cooking area is arranged with a support unit (5) that is suitable and adapted for positioning a container containing an item to be cooked. A damping device is arranged in a partially elastic manner and is utilized for arranging the sensor device in an installation position below the support unit.
