Abstract (en)

[origin: WO2013068357A1] The invention notably relates to a method and device allowing an operator to exchange a discharged traction battery (113) of an electric or hybrid vehicle (3) for a recharged traction battery (114). The device comprises a pit in which are located lifting means (21) for lifting the vehicle, which comprise means (219) for immobilizing the vehicle in a reference position with respect to the direction longitudinal to the vehicle (X) and means (219, 220, 221) for immobilizing the vehicle in a reference position with respect to the direction transverse to the vehicle (Y). The device also comprises means for immobilizing the vehicle in a reference position with respect to the vertical direction (Z) and lifting means (24) for raising and lowering means for unlocking the discharged battery from the vehicle or locking the recharged battery to the vehicle.
