Abstract (en)  
[origin: WO2013068332A1] A carton (20) comprising an outer container (1) and at least one inner container (10) wherein the outer container receives the inner container(s) is provided. The outer container (1) comprises a lid (2), a bottom wall (3), a rear wall (4), two side walls (5, 6), a substantially open front section and a closure means. Each inner container (10) comprises a bottom panel (11), a top panel (12), two side panels (13, 14), a front panel (15) and a rear panel (16); a section of the rear panel is openable, so as to provide the inner container with an opening. The inner container(s) are hingedly attached to the outer container (1) so that each inner container (10) can pivot from a closed position wherein the inner container (10) is located inside the outer container (1) to an open position wherein the inner container (10) is located substantially adjacent to the outer container (1).
