Abstract (en)

[origin: EP2777416A1] A skate boot (10) comprising an outer shell (12) including medial and lateral side portions (50; 60) for facing the medial and lateral sides of the foot. Each of the medial and lateral side portions has an upper edge (51; 61). The skate boot also comprises a lace member (80) mounted to either of the upper edges of the medial and lateral side portions. The lace member has at least one opening (90) for receiving an insert (100). The lace member has a first flexion mode when no insert is received in the at least one opening and a second flexion mode when the insert is received in the at least one opening. The second flexion mode is different from the first flexion mode.
