Abstract (en)
The invention relates to a chair system for multiple uses. The chair system comprises a chair (10) and a support (20). The chair (10) comprises a seat (11), four legs (13) and a support frame (14) that is fixed underneath the seat (11). The support frame (14) comprises at least a first mounting place (15) and a second mounting place (15) for the support (20), and the first mounting place (15) is on a different side of the chair (10) with respect to the second mounting place (15). The support (20) is suitable to be releasably connected to the support frame (14) through mounting places (15) so that when the support (20) is connected through the first mounting place (15) the support (20) is for different use with respect to when the support (20) is connected through the second mounting place (15). The invention further relates to a kit for retrofitting a chair (10).
