Abstract (en)

[origin: EP2777890A1] An electric power tool that performs simple authentication when starting operation. An electric drill driver includes a driver main body (20) and a battery pack (30). The battery pack (30) is attached in a removable manner to the driver main body (20). The driver main body (20) includes a motor (40), a controller (50), and a memory (60). The memory (60) stores a battery authentication program and includes a battery authentication information holding unit (61). The battery pack (30) includes a battery identification information holding unit (37). When a user pulls a trigger switch on the driver main body (20), the controller (50) performs a battery identification information acquisition step, a battery authentication step, and a motor control step in accordance with a battery authentication program.
