Abstract (en)  
[origin: EP2778089A1] The cup has a handle connecting portion (6) which is formed by projecting outwardly from cup main portion (1). The bottom of main portion is provided first bottom portion (5), so that cup having cup opening (19) facing upwardly on base is adjusted. The second bottom portion is provided with different level to standstill on horizontally oriented base of cup as above level of first bottom portion, such that focus of partially filled cup is carried out as away from longitudinal axis in the direction in which handle portion (7) lies diametrically opposite.
