Abstract (en)
[origin: EP2778106A1] According to one embodiment, a paper-sheet processing apparatus includes a feed unit (11), a pickup unit (14), an inspection unit (18), a stacking unit (66), a backup drive unit, a banding unit (68), at least one power supply, a mode setting unit, and a fixing unit. At least one power supply supplies electric power to electrically operational parts of the extraction unit, inspection unit, stacking unit, backup drive unit, and a banding unit. The mode setting unit sets a standby mode in which electric power supply to at least one of the electrically operational parts is suspended temporarily. While the standby mode is set by the mode setting unit, the fixing unit fixes the backup to a position for setting of the standby mode.
