Abstract (en)

[origin: EP2778275A1] The housing (1) has a bottom module (2) comprising a rear wall (3), side walls (4, 5) and a front wall (6), which is arranged between the side walls for a frameless construction of the housing. The rear wall is fixed in an upper region with integration of metal brackets, which is in positive connection with the rear wall. Bottom portions of the side walls are merged at the bottom module in a form closure, which is held under a backlash. Punched holes are formed in lower side edge profiling parts (10) of the side wall.
