Abstract (en)

[origin: EP2778279A2] The housing has a bottom module (1) comprising a side wall, a rear wall and a front wall (2), where the bottom module is attached in a pre-defined latched position for a frameless construction of the rear wall. The bottom module is provided with a center pin (3) for centering the rear wall and an engagement hook (4) for holding the rear wall, which is cooperated with an appropriate hole punching part (5, 6) at the rear wall in an attached state. An introduction bevel is arranged at the engagement hook and adjoined with a vertically arranged latching web portion. An independent claim is also included for a method for assembling a rear wall of a housing for household appliances.
