Abstract (en)

[origin: EP2778280A1] The housing (1) has a base module (2), a front wall, side walls and a rear wall connected together by a cross element. The rear wall is formed with an opening in which a pin formed at the bottom module is attached by pre-adjustment. A fixing element (6) accessible from the outside is formed between the base module and the rear wall, for fixing the rear wall transversely to the base module by horizontal and vertical alignment of the rear wall and base module.
