Abstract (en)
[origin: EP2778325A2] The device (1) has a locking body (4) pivotable about a pivot axis and between blocking position for blocking furniture parts in pushed-in position and release position for pulling one of the furniture parts out of a furniture body, where the locking body is pivotable about the pivot axis out of the blocking position into the release position in two pivot directions, which are opposite to each other. The locking body is mounted in a supporting body (7) pivotable about the pivot axis. One of locking body or supporting body comprises a latching element.
