Abstract (en)

[origin: EP2779320A1] The connector (10) has a cable sleeve (20) comprising two sleeve parts (30, 40), which include longitudinal axes. One of the sleeve parts is fixable relative to the connector in two different positions rotated around one of the longitudinal axes. The other sleeve part is fixable relative to the connector in two various positions rotated around the other longitudinal axis. The longitudinal axes are positioned to each other in one of the fixed positions of the cable sleeve in a non-zero angle.
